

What If Your Email Bill Never Went Up?

Legacy platforms punish business growth. The larger your audience gets, the higher your monthly bill, even for dormant contacts.

LEGACY SAAS: EXPONENTIAL CAMPAIGNSTACK: FLAT

01 The Per-Contact Tax

Paying thousands monthly just to store customer contacts in someone else's closed database.

02 Single Provider Lockout

When your single sending vendor has an outage or rate freeze, business communication halts completely.

03 The Spam Folder Trap

Burst sending thousands of emails in seconds triggers spam filters and permanently harms domain reputation.

ANNUAL SAAS OVERHEAD SAVINGS

25k Contacts: **Save** 100k Contacts: **Save**
~₹2,00,000 / yr ~₹7,00,000 / yr

Take Full Control of Your Broadcasts

Carving IT engineers deploy your private dispatch server, authenticate DNS, and configure redundant sending pipes.

MONTHLY COST FOR 100,000 CONTACTS

Mailchimp Standard	₹62,000+/mo
Klaviyo Enterprise	₹90,000+/mo

CampaignStack + SES **Flat & Affordable**
(~₹800/send)

Data Sovereignty: Customer records stay inside your private SQL DB

Multi-Gateway Redundancy: SES, Brevo, Google, and M365 hot standby

100% Sender Alignment: Strict SPF, DKIM 2048-bit, and DMARC setup

ENTERPRISE EMAIL PLATFORM

Email Marketing Without the Monthly Penalty.

Send high-converting newsletters to your entire audience without paying extra simply because your contact list grows.

Keep All Your Contacts: Flat server pricing with zero list penalties

Never Miss a Send: Multi-gateway standby failover protection

100% In-Box Delivery: Paced, human cadence prevents spam traps

CAMPAIGNSTACK

01 // SOVEREIGNTY

OVERVIEW & PHILOSOPHY

Built for Businesses That Value Their Audience

CampaignStack was developed by Carving IT to give founders and marketing teams total control, rock-solid reliability, and honest flat pricing.

01 You Own Your Audience

Your subscriber list stays safely in your private database. No third party ever mines, analyzes, or holds your contacts hostage.

02 Total Provider Freedom

Connect the email infrastructure you already trust, including Amazon SES, Google Workspace, Brevo, and Microsoft 365, with zero vendor lock-in.

03 Always-On Protection

Intelligent circuit breakers automatically route around slow or throttled relays so your critical marketing announcements always arrive on time.

"Scale from 5,000 to 500,000 contacts without paying a single rupee more for list storage."

“

DATA PRIVACY GUARANTEE 100% PRIVATE & SOVEREIGN

02 // MULTI-RELAY DISPATCH

HOT STANDBY

CORE CAPABILITIES

Simple Tools for Incredible Delivery

Everything you need to send campaigns that actually land in customer inboxes, explained in plain English:

Smart Automatic Backup

If Server A gets busy or encounters an issue, Server B takes over instantly. Zero lost emails.

Natural Paced Sending

We pace out your delivery with natural human delays so Gmail welcomes your email as friendly mail.

Clean Contact Verification

Checks for typos and dead inboxes before dispatching, protecting your domain sender score.

4-Step Studio Console

Pick your audience, choose your servers, select your sending speed, and watch it deliver live.

ACTIVE GATEWAY ECOSYSTEM

• Amazon SES • Brevo • Google • M365 • Postmark
• Private SMTP

01. AUDIENCE → 02. RELAYS → 03. PACING → 04. IN-BOX

03 // VERIFIED AUDIT

PROVEN RELIABILITY

VERIFIED CAPABILITIES

Engineered for In-Box Precision

Real technical benchmarks delivered by CampaignStack's multi-gateway dispatch core:

99.4%
